RE: Docket No. 00N-1396/00D-1598

We are not guinea pigs; we are humans. Therefore:

- 1) We want mandatory testing of all genetically engineered (GE) and/or genetically modified (GM) foods.
- 2) We want mandatory labeling of GE and/or GM foods.
- 3) We request a moratorium on all GE and/or GM foods until long-term studies by unbiased independent researchers show that GE and/or GM foods are safe for humans and the environment.

We will not voluntarily eat GE/GM foods or foods treated with pesticides, hormones or antibiotics, or foods that have been irradiated, without sufficient proof that such foods will not harm ourselves or our pets or the environment.

Sincerely,

*James L. Bouck*  
James L. Bouck and

*Marian Mapes-Bouck*  
Marian Mapes-Bouck
